PROFESSIONAL SUMMARY

Final-year MCA student with foundations in machine learning, full-stack web development, and cloud computing. Hands-on experience delivering real-world projects — including a Top-10 nationally recognised AI solution at NASA Space Apps Challenge 2025. A fast learner with a collaborative mindset, seeking an opportunity to contribute meaningfully to an engineering team and grow alongside industry professionals

EDUCATION

Master of Computer Applications (MCA) 2026

St Joseph's College of Engineering and Technology, Pala | Coursework: Cloud Computing, OOPS, Data Structures, DBMS

Bachelor of Science — Botany 2021

St Thomas College, Pala, Kerala | NSS Volunteer — Leadership & Community Service

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, SQL (basics)

ML / AI: PyTorch, 1D-CNN, Random Forest, KNN, scikit-learn

Web & APIs: Flask, React, REST APIs, OpenAI API

Cloud & Tools: Cloud Computing (NPTEL), Git, GitHub, Linux, Microsoft Excel (Advanced)

PROJECTS

NASA Exoplanet Classifier — Top 10, NASA Space Apps Challenge 2025

Python | PyTorch | 1D-CNN | Flask | HTML / CSS / JavaScript

- Designed and trained a 1D Convolutional Neural Network to classify exoplanet candidates from Kepler, K2, and TESS stellar light-curve data, achieving 95% detection accuracy with 3.2-second average inference speed.
- Built a complete full-stack web application (Flask backend, JavaScript frontend) and ranked in the Top 10 out of all participating teams at the national event hosted at Amal Jyothi College of Engineering.

Fraud Detection System 2025

Python | Flask | OpenAI API | HTML / CSS / JavaScript

- Developed a real-time fraud detection application that combines an ML classifier with the OpenAI API to flag suspicious transactions and generate clear, human-readable explanations for each alert.

Startup Support Platform 2026

Python | Flask | React | Random Forest | KNN

- Built a recommendation platform using ensemble ML models (Random Forest + KNN) to match early-stage startups with relevant resources, investors, and mentors through a React-based frontend.

CERTIFICATIONS

- NPTEL — Cloud Computing (cloud infrastructure and services)
- From Code to Concept: Essentials of Object-Oriented Programming
- Preparing Data for Analysis with Microsoft Excel — Microsoft / Coursera, March 2026

WORK EXPERIENCE

Business Developer & Sales Executive — Joyalukkas India Ltd, Hyderabad Dec 2021 – Apr 2024

- Maintained Excel-based client data systems with high accuracy across a high-volume retail jewellery operation; handled data entry, reporting, and record management.
- Built strong client communication and cross-functional team collaboration skills while managing end-to-end client lifecycle responsibilities.

LANGUAGES

English, Hindi, Malayalam — Fluent (speaking, reading, writing) | Telugu — Conversational
